When you think of famous classical music, I am sure that a few particular composers come to mind. That is because these few composers works were so profound, and they produced a number of great pieces. Famous composers like Johan Sebastian Bach, Ludwig Von Beethoven , and Wolfgang Amadeus Mozart probably come to mind. These three masterminds put much more that melodic thought into their works. They have touched mankind in a way that nobody else could ever do.

In my opinion, famous classical music is the best cure for those who find it hard to fall asleep because of this. Listening to this soft, melodic music can transport you to another place, relax your mind and muscles, and soothes your mind into sleep. I often play some famous classical music when I go to bed, its the best way to get a good rest.
